

## Bigger! Better! BS? We challenge the penis-enlargement industry

### Golden Gun Capsules

I'm not exactly sure what's in these Chinatown-bought pills, aside from "essences of precious herbs and animals," but I must admit it was kinda fun. That is, once my self-confidence recovered from the label indications of "underdeveloped sexual organs, impotence, infirm erection," blah-blah-blah. After a week of twice-daily pills and semi-permanent erections, I notice my unit is slightly fatter and longer especially during these times when it would shrivel. As in the 600. Now I can pass for Bradish in my Speedo. John "Yea Man, Fake Man" Doe.

### Beverly Hills Surgical Specialists

For lengthening, they make an incision about an inch from the top of the penis base and release some ligaments. Then you use weights to stretch it out. Two weeks after the surgery, I could have sex again. Six months later, I got the "allograft" and added an inch and a half to the circumference. They peel it down like a banana and add layers of human tissue. It takes eight weeks to heal. Now it's over 7 inches around. It's better than having a Corvette. It can never be too big. If it touches the ground, I want it to touch the next city. Lou "Huge" Dick [Patient "Lou" was provided by BHSS. —eds.]

### Ball stretchers

Okay, I don't get what I was asked to put my nuts in a sling other than just to give the rest of the staff something to laugh about. 'Cause they sure don't stretch. If anything, they needed the penis to stretch like they do when I see Lori heading my way. We're in the day to score up copy that is still AWOL. Plus, the de Sadomasochists ripped out half of my pubec. Who designed this thing—Aerobic Sciences? Or "Swing Low, Sweet Chorus" VanPublics.

### The Professional Trigger Pump Complete Penis Enlargement System

The Professional has a one-finger trigger, "special formula," lube, an erection ring and a control instructional video starring porn dude John West. It promises that you can reach "mammoth dimensions"—hardly. We could definitely see my boyfriend's little friend getting longer in the women's lounge, but as soon as we took it out, it was back to normal—which is great. Basically, his thing sucked. Kristin "Bubark" McSperry.

### Penis-enlargement workout

My husband, Eric, and I coughed up \$40 for a "member" ship to [www.biggerpenis.com](http://www.biggerpenis.com), which gave us access to instructions for exercises like the Dual Stroke, the Jelo, "waddle lifts" and the PC. The idea is to work out your penis through stretching, managing, pulling, "milking" and bending it for minutes at a time. You even get guidelines, a log to track your progress and very-illustrative how-to manuals. Most also require Kegel. Two weeks later, Eric an' I are bigger, but he sure is happier. And isn't that what's really important? Kevin "Jaysworn" Casapole.
